8:00 PM NOVA: MISSING IN MIG ALLEY - D

Russian and American fighters clashed over Korea in one of the fastest dogfights ever seen. This was the world's first jet war, pitting the two most advanced planes of their day, the American F-86 Sabre and the Soviet MiG-15, in furious air battles that pushed their pilots' skills to the limit. The epicenter of the air campaign was MiG Alley, a strip of airspace between the Korean-Chinese border. Flying higher and faster than ever before, American and British pilots had little idea of the hidden dangers that awaited them if they were shot down. Thirty-one Sabre pilots are believed to have survived crash landings, and the evidence suggests that a few of the pilots were captured and secretly imprisoned in Russia. In "Missing in MiG Alley," NOVA follows the poignant and sometimes harrowing efforts of family members to trace what happened to pilots who went missing over half a century ago. The program combines forensic detective work with an in-depth look at why the Sabre and the MiG acquired their reputations as legendary fighting machines. With the help of dramatic reconstructions, rare archival footage and interviews with veteran aces, NOVA puts viewers in the cockpit to experience the lethal split-second duels in the skies over MiG Alley.

8:00 PM NATURE: EAGLES OF MULL - **D**

The Scottish island of Mull provides a beautiful backdrop for this insider's guide to its thriving wildlife. Located off the coast of western Scotland, the island of Mull is one of those rare and fortunate places that seem untouched by the passage of time. From its powder-white beaches to snow-capped mountain peaks, Mull has an incredible diversity of life. A blend of mountains, forests, bogs, coastline, moorland and crystal clear rivers, Mull's rich variety of habitat is matched only by the abundance of wildlife. The golden eagle and the rare white tailed eagle, which has only returned to Mull in the last 15 years, have strongholds on the island. But these aerial killers are not alone in the skies above Mull. The calls of gulls, oystercatchers, curlew and skylarks fill the air. The numerous species of birds represent just a small part of the island's biodiversity. The surrounding waters play host to minke whales, bottlenose dolphins, grey seals and basking sharks. Otters fish in the many sea lochs, while on land you're likely to catch sight of deer, mink and maybe even the elusive wild white goats. Cameraman Gordon Buchanan turns the lens on his birthplace to give an insight into the wild characters of this remarkable island.

In 1947, a B-29, on a secret reconnaissance mission over Russia, became lost over the North Pole. The pilot made an emergency landing in Greenland, and the crew was rescued. This program

follows pilot Darryl Greenamyer as he heads an expedition into the Arctic to rescue the downed B-29. Battling unpredictable weather, an unforgiving landscape, limited equipment, illness and fatigue, his team rushes to refurbish the plane before the harsh winter sets in. The second half of the program focuses on the Titanic's sister ship, the Britannic. Few people realize that the Titanic had two nearly identical sister ships, the Olympic and the Britannic. The Olympic had a successful career as a liner until she broke up in 1935, but the Britannic met a fate almost as unlucky as the Titanic's. Serving as a hospital ship in the Aegean, it was either torpedoed or struck a mine on November 21, 1916, and sank within an hour, yet only thirty of the crew of 1,100 died. Nova joins the search for the wreck of the Britannic and explores the evidence of its dramatic end.

9:00 PM AMERICAN MASTERS: MERLE HAGGARD: LEARNING TO LIVE WITH MYSELF

This candid documentary about Merle Haggard includes interviews with Willie Nelson, Kris Kristofferson, Ray Price, Dwight Yoakam, Lucinda Williams and Allison Krauss. The film reveals how the hardscrabble people with whom Haggard was raised -- his juvenile delinquency and incarcerations -- still inform his creativity and perspective. He hopped his first freight train at the age of 10, became a chronic truant and drinker and was locked up some 17 times as a youngster. Serious criminal charges followed and Haggard was an inmate in the audience in 1959, when Johnny Cash gave his New Year's Day concert in San Quentin -- and, as he's said repeatedly, "my life changed forever." We have followed Haggard on camera for the past two years -- at home on the ranch and on tour at concerts. A kind of wandering troubadour, who's led his band The Strangers since 1965, Haggard is known as a singer's singer and a guitar player's guitar player --

his voice, his finger picking and his interpretations are like none others. At 72, he recently survived major lung surgery and is now in top physical shape, full of creative juices and hitting new artistic and commercial highs. His expressed concern for keeping his music honest in a changing industry and in a changing world is palpable.
